

Solar "KAUAI" Pendant Light

Model NO.: HK-SL700-3

Read these instructions carefully and thoroughly before operating this unit. **IMPORTANT SAFETY INSTRUCTIONS. READ AND SAVE THESE INSTRUCTIONS.**

First time use:

If the solar panel is covered with a thin protective film, remove it before using the product. Move the ON/OFF switch to the "ON" position. Install the hook onto the wire and the clip to the bottom of the solar panel post.

Charging Direction:

Place the solar panel in an area where it can receive direct sunlight for at least 8 hours each day. Shadowed locations will not allow the battery to charge fully and will reduce the hours of night time lighting. The selected location should not be near night time light sources, such as porch lights, street lights or pool lights, as these may cause the solar pendant to turn off prematurely.

Mounting the fixture:

- Install the "S" hook on the wire by following the below steps:

Mounting the solar panel:

Option #1 - Clip mount

- Press the solar panel post onto the clip.
- The clip can be used to attach the solar panel to a gazebo.

Option #2 - Spike mount

- Press the solar panel post onto the spike.
- Carefully push the solar panel into the ground (if the ground is hard - make a hole first to avoid damage).

Battery Replacement:

NOTE: This operation should be done in the morning on a sunny day. This will allow the solar panel to receive a full 8 hours of sunlight so that the rechargeable battery can reach maximum capacity.

- Remove the battery cover by sliding it off of the solar panel
- Remove the old batteries and replace with new AA size 1.2V rechargeable batteries of same or greater capacity (mAh).
(USE RECHARGEABLE BATTERIES ONLY)

Note: Clean the battery contacts and those of the device prior to battery installation.

- Be sure to insert the battery in proper direction.
- Replace the battery cover by sliding it back onto the solar panel.

Warning:

- Safe for outdoor operation.
- Failure to insert battery in the correct polarity, as indicated in the battery compartment, may shorten the life of the battery or cause battery to explode or leak.

- Do not mix old and new batteries.
- Do not mix alkaline, standard (Carbon-zinc), or rechargeable (Ni-Cd, Ni-Mh, etc) batteries.
- Do not dispose of batteries in fire.
- Batteries should be recycled or disposed of as per manufacturer's recommendations.
- Remove battery is consumed or if product is to be left unused for a long period.
- **REPLACEMENT PARTS MAY BE ORDERED BY USING THE FIXTURE MODEL NUMBER AND THE PART'S NAME.**

Care and Cleaning:

Solar panel should be cleaned periodically with damp cloth for maintaining optimum performance (to remove dust and debris). Do not place in areas where children normally play, or where they may trip and fall against the solar panel.
